STANDARD 100

084270.0 CENTROCOT

Special Effects HTV

Glitter

 Temp	 Time	 Pressure	 Peel	 Wash
160 °C	15 sec	medium	hot	40°C

Add instant brilliance to your creations with this shimmering HTV. Its richly textured surface reflects light from every angle, creating a vibrant, high-impact effect that turns even simple graphics into statement pieces.

Stripflock® Pro

 Temp	 Time	 Pressure	 Peel	 Wash
155 °C	15 sec	medium	warm	60°C

A velvety, suede-like HTV designed to bring volume and texture to your creations. With its thicker structure and soft touch, *StripFlock Pro* delivers a premium, dimensional look ideal for bold lettering and elegant designs.

Metal

 Temp	 Time	 Pressure	 Peel	 Wash
150 °C	10 sec	medium	cold	40°C

Give your creations a sleek, shiny finish with Metal HTV. Its ultra-smooth feel and brushed metal appearance enhance graphics with a clean, luminous look, making it ideal for contemporary designs, sharp details, and bold visual statements.

Holographic

 Temp	 Time	 Pressure	 Peel	 Wash
155 °C	15 sec	medium	cold	40°C

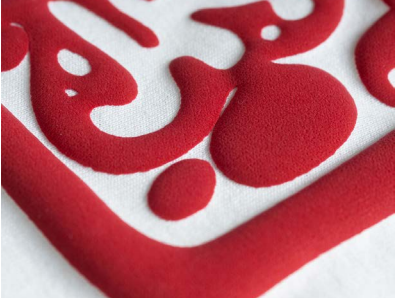

Holographic HTV features a prismatic surface that shifts color and intensity with movement. This special material can be cut to replicate rhinestones, creating clean, defined faux-strass effects without the hassle.

Easy Puff

 Temp	 Time	 Pressure	 Peel	 Hand Wash
±140 °C	10 sec	medium	hot	

Easy Puff transforms every design into a soft, bold 3D effect: heat-activated, it expands to create a raised texture. Also available in a Metallic version for an even more eye-catching, brilliant finish.

Brick® 600

 Temp	 Time	 Pressure	 Peel	 Wash
155 °C	25 sec	medium	cold	40°C

Brick 600 is a 600-micron thick heat transfer vinyl designed for small logos and graphics that need to stand out both visually and to the touch. Also available in dual colors for added visual contrast.

Aurora®

 Temp	 Time	 Pressure	 Peel	 Wash
150 °C	15 sec	medium	cold	60°C

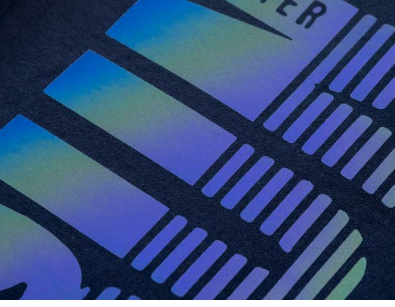

Aurora is a color-shifting heat transfer vinyl that reacts to light, creating unique, iridescent reflections. Its distinctive woven finish offers a smooth yet textured look, adding depth and dimension to any project.

EasyReflective

 Temp	 Time	 Pressure	 Peel	 Wash
150 °C	15 sec	medium	hot	40°C

EasyReflective is a highly reflective HTV designed for applications that require enhanced visibility. Its glass bead construction reflects light intensely when illuminated, making it ideal for safety-focused projects and workwear.
