

TITAN

SPECIALTY OVERLAMs

When you want more than protection, go for impact.

TITAN Specialty Overlams offer the same durability as our other overlams, with added visual and functional enhancements. Go bold with holographic effects, or choose structured textures that add grip where control matters most.

ARMOR SERIES

A series of three textured overlams, not just a pattern you can see, but a texture you can actually feel. Providing extra thickness and extra protection to printed graphics. Giving your graphics ARMOR where they need it most. Ranging from 350 to 450 microns to ensure a thick, substantial feel to printed kits.

Including GNAR 450 (TLGX-450), VIPER 450 (TLVX-450) and KNOX 350 (TLKX-350).

OPTIX SERIES

All OPTIX overlams are built with the same 300 micron construction, adding extreme protection and attitude to printed graphics. This more robust, more rigid composition is made for those who value performance. Just choose your favourite effect from the six.

Including VOLT 300 (TLVX-300), TLQX-300 (QUARTZ 300), ASTRA 300 (TLAX-300), NEXUS 300 (TLNX-300), MATRIX 300 (TLMX-300) and PYTHON 300 (TLPX-300).

STRONG PROTECTION

MAINTAINING CLARITY

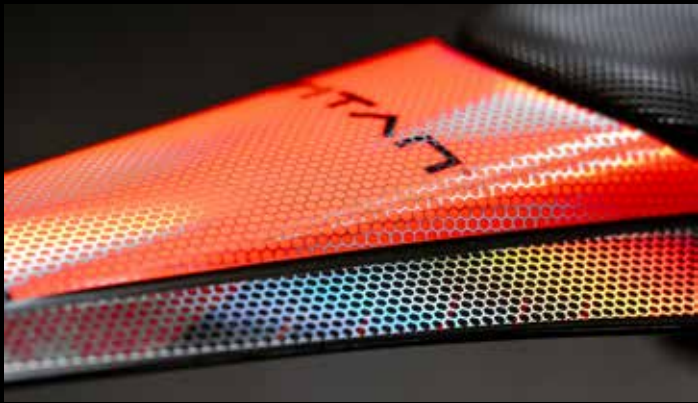

SCRATCH RESISTANT

SPECIALTY FINISHES

KNOX 350 | TLKX-350

MATRIX 300 | TLMX-300

Technical data

	ARMOR SERIES	OPTIX SERIES
Face Film		
Finish	Clear, textured pattern	Gloss clear, holographic pattern
Material	Polymeric PVC	Polymeric PVC
Thickness (µm)	450 (GNAR 450 & VIPER 450) 350 (KNOX 350)	300
Adhesive		
Type	Solvent acrylic	Solvent acrylic
Thickness (µm)	50 (GNAR 450) 55 (VIPER 450 & KNOX 350)	55
Release liner		
Type	Kraft paper, DSPE	Kraft paper, DSPE
Roll sizes	1370mm x 25m	1370mm x 25m
